“ *My memories are not of Anka, rather of what I have learned about her through Danny. Danny was very devoted to his mother and to providing her the best possible care. Nearly every time I saw Danny he was taking something home to his mother. He was a very devoted care giver, I attribute this to his upbringing and the care and guidance Anka provided to him during his childhood and as an adult.*

I wish I had of know Anka, from what I've learned about her from Danny she was a wonderful woman with many talents.
